Domain

www.honeywellproducts.com

Project Type

Product Manufacturing + CCTV Products + Security Solutions + eCommerce + B2B/B2C Sales Platform

Technology

- React.js Frontend
- Modern responsive UI
- API-based Backend
- Scalable Database
- Admin Panel
- eCommerce Integration
- Payment Gateway
- CRM/Lead Integration
- SEO-Friendly Architecture

1. BUSINESS POSITIONING

Existing Website

Honeywell IT Solutions

www.honeywellitsolutions.com

Purpose:

- IT Solutions
- Software Development
- Website Development
- Application Development
- Developers Team
- Technology Services
- IT Consulting

- Corporate Services

New Website

Honeywell Products

www.honeywellproducts.com

Purpose:

- CCTV Cameras

- Wi-Fi Cameras
- 4G Cameras
- Solar CCTV
- PTZ Cameras
- NVR
- DVR
- Surveillance Storage
- Networking Products
- CCTV Accessories
- Security Solutions
- Solar Products
- Future Manufactured Products

The new website should be developed as a **complete product sales and business platform**, not as a normal corporate website.

2. MAIN BUSINESS MODEL

The website should support four major business models.

A. B2C – Direct Customers

Customer visits website:

Search Product → View Product → Add to Cart → Payment → Order

B. B2B – Bulk Customers

Customer:

Search Product → Select Quantity → Request Bulk Quote → Sales Team Follow-up → Quotation → Order

C. Dealers and Distributors

Business partner:

Partner Registration → Approval → Login → Special Pricing → Bulk Order → Support

D. Solutions Business

Customer requirement:

Home / Office / Factory / Warehouse Security Requirement → Recommended Solution → Products → Quote / Purchase

11. PRODUCT SPECIFICATION SYSTEM

Developer should create a **dynamic specification engine**.

Do not hardcode only CCTV fields.

Each category should have different specification templates.

For example:

Camera Specifications

- Resolution
- Sensor
- Lens
- IR Range
- WDR
- AI
- Audio
- PoE
- Storage
- IP Rating
- Power
- Warranty

NVR Specifications

- Number of Channels
- Resolution
- HDD Slots
- Storage Capacity
- HDMI
- PoE Ports
- Network Interface

Solar Product Specifications

Can have completely different fields.

This is important for future expansion.

12. PRODUCT COMPARISON PAGE

URL:

/compare

Allow customers to compare 2–4 products.

Example:

Specification Camera A Camera B Camera C

Resolution	2MP	4MP	8MP
Night Vision	20m	30m	50m
AI	No	Yes	Yes
PoE	Yes	Yes	Yes
IP Rating	IP66	IP67	IP67

35. REACT DEVELOPMENT REQUIREMENTS

The developer should build the website with:

- Reusable Components
- Dynamic Product APIs
- Dynamic Category APIs
- Dynamic Product Specifications
- SEO-Friendly Rendering Strategy
- Responsive Design
- Mobile First Design
- Fast Loading
- Optimized Images
- Lazy Loading
- Secure Authentication
- Secure Payment Integration
- Scalable Backend
- API Documentation

36. IMPORTANT DATABASE REQUIREMENT

The developer must not create a database only for CCTV cameras.

The database architecture must support:

CURRENT

CCTV Products

NEXT

Solar Products

FUTURE

Smart Electronics

Other Manufactured Products

The product system should support:

Category → Subcategory → Product → Dynamic Specifications

This will prevent rebuilding the website when Honeywell Products expands.

40. FINAL DEVELOPER INSTRUCTION

IMPORTANT

HoneywellProducts.com should not be developed as a simple static company website.

It should be developed as a scalable digital product ecosystem.

Complete Platform Structure
